

# BOOK and CLAIM COMMUNITY

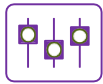

for heavy transport decarbonization

Welcome to this **Book and Claim Community**. The mandate is clear, and the transportation sector's voice is united: we need voluntary market-based measures to accelerate heavy transport decarbonization, and those measures need to be coordinated and communicated consistently to reach their full potential. Book and claim is a tool that—when robustly implemented—can help enable and accelerate transport decarbonization by connecting ambitious buyers and sellers to decarbonize their value chains, together.

This Book and Claim Community was created to support and catalyze efforts across numerous stakeholders working towards the development of a coordinated book and claim chain of custody approach for transport decarbonization.

To accelerate our shared vision, we are building on and informing best practices in book and claim systems and working with leading practitioners. Our promise is to serve as a central hub, reduce duplication, and communicate our findings.

This Book and Claim Community is headed by a Secretariat, co-chaired by **RMI** and **Smart Freight Centre**, which has been charged with managing collaboration across four work areas:

## Reporting & Targets

Coordinate engagement with key reporting and target-setting organizations and support consistency across emissions accounting guidance

## Certification

Pursue alignment across approaches for certifying claims, standards for book and claim, and communication with assurance providers

## Registries & Related Applications

Facilitate coordination between registry and related software solution providers

## Capacity & Communication

Implement a cross-sector capacity-building and communication strategy, including summarizing and strategically communicating pilot approaches and outcomes

We want to hear your thoughts, applaud your work, and help where possible. Connect with us at [www.BookAndClaimCommunity.org](http://www.BookAndClaimCommunity.org) or via: [Secretariat@BookAndClaimCommunity.org](mailto:Secretariat@BookAndClaimCommunity.org).

**RMI** is an independent, non-partisan, nonprofit organization of experts across disciplines working to accelerate the clean energy transition and improve lives.

**Smart Freight Centre** is an international nonprofit focused on freight decarbonization with extensive experience developing reputable, universal transportation emissions programs and accounting frameworks.
